

Health Economics for Part A MFPH Exam

HALF DAY REVISION SESSION

AT ARDUDWY HALL, BANGOR UNIVERSITY, LL57 2PZ

1pm, Tuesday 12th May 2015

Session Director : Professor Rhiannon Tudor Edwards

BUILDING ON 20 YEARS OF OUR EXPERIENCE

in teaching health economics to public health practitioners and those undertaking research in public health. At the end of session you will have gained an appreciation of the concepts, methods and application of health economics to public health and feel confident in attempting health economics examination questions.

In relation to the Part A exam, we will review, focussing on past exam questions and exam technique including:

- principles of health economics including the notions of scarcity, supply and demand,
- distinctions between need and demand, opportunity cost, discounting, time horizons, margins, efficiency and equity;
- assessing performance;
- financial resource allocation;
- systems of health and social care and the role of incentives to achieve desired end points;
- techniques of economic appraisal including cost effectiveness, and modelling cost utility analysis, option appraisal and cost benefit analysis, the measurement of health benefits in terms of QALYs and related measures;
- marginal analysis;
- decision analysis.

Registration closes 1st May 2015

**Total cost with
lunch: £125**
